No. 3403 of 1909.

From

MAJOR J. JACKSON, M.B., I. M. S.,
Acting Inspector-General of Prisons,
Bombay Presidency ;

To

THE SECRETARY TO GOVERNMENT,
Judicial Department,
Bombay.

Inspector-General of Prisons' Office :
Poona, 31st March 1909.

SIR,

I have the honour to submit the Annual Administration Report, together with the usual statistical tables on the Prisons and Jails in the Bombay Presidency (including the Province of Sind and the Settlement of Aden), for the year 1908. The office of the Inspector-General of Prisons was held by Mr. H. N. Alexander up to the 6th November 1908, on which date I assumed charge of the Department.

JUDICIAL.

2. The number of Central, District, Special and Extramural Prisons has undergone no change during the year under report. Statistics of all the 3rd Class Subsidiary Jails have been grouped together with those of the Lock-ups as was done in previous years.

3. From the general summary preceding the statements in the appendices to this report, it will be seen that the total population of all classes of Prisons, Subsidiary Jails, Lock-ups and Civil Jails, during the year 1908, has been 90,408 against 87,250, an increase of 3,158. The daily average population has been 9,327 showing an increase of 473 over the figures of the year previous.

Statement No. I—Number and disposal of convicts.

4. The following table, which compares the figures of the past two years, refers to the admission of convicts into Prisons and 1st and 2nd Class Subsidiary Jails only :—

	1907.			1908.		
	Males.	Females.	Total.	Males.	Females.	Total.
Number remaining on last day of previous year { Prisons	6,989	264	7,253	7,387	275	7,662
Number remaining on last day of previous year { Jails	238	15	253	243	13	256
Imprisoned during the year { Prisons	12,404	1,105	13,509	13,416	1,066	14,482
Imprisoned during the year { Jails	1,507	190	1,697	1,519	194	1,713
Total... { Prisons	19,393	1,369	20,762	20,803	1,341	22,144
Total... { Jails	1,745	205	1,950	1,762	207	1,969
Grand Total	21,138	1,574	22,712	22,565	1,548	24,113
Daily average Number	7,266	272	7,538	7,606	307	7,913

5. The increase under admissions of convicts in Prisons referred to in the above table can be ascribed to the Common Prison, the Central Prisons of Yeravda and Ahmedabad, the Prisons of Dhulia, Kárwár and Karáchi, and the Thána Special Prison. The increase in the Common Prison is partly due to cases of rioting, and partly to the increase in offences of petty thefts,

The increase in Dhulia and Yeravda Prisons is attributed by the Superintendents to the dearness of food-grains. In the Ahmedabad Central Prison, the increase was due to a larger number of convictions under Chapter VIII of Criminal Procedure Code and under the Abkári Act; and in the Kárwár Prison, convictions under the Forest Act account for the increase in admissions. In the Karáchi Prison, the increase was mainly due to the prevalence of Cerebro-spinal Meningitis in the Hyderabad Central Prison, which necessitated the closing of that Prison to new admissions for nearly two months.

6. With regard to the disposal of convicts, there is an increase under the head of "Released by order of Government." This is due to 714 prisoners having been released under the orders of Government on the occasion of the 50th Anniversary of the assumption of direct administration of India by the Crown. Of the remaining 32, 4 prisoners were released on the grounds of sickness, one from Kárwár, two from Ahmedabad and one from Karáchi. Fourteen ex-military convicts were sent to England from House of Correction. Five unfit life transports were released on expiry of 14 years' imprisonment. Three from Yeravda, one from Ahmedabad and one from Hyderabad. Nine prisoners, 4 from Common Prison, 3 from Yeravda, one from Thána and one from House of Correction were released on other grounds. In January 1908, 54 male and 8 female transports were deported to the Andamans against 40 in 1907. These prisoners were sent *vid* Alipore Jail. The heading "Transferred to Lunatic Asylum" shows an increase of 8 over the figures of the previous year. The heading "Escaped" shows an increase of 12 against none in the last year, while the heading "Executed" shows a decrease of 5 over the figures of the year 1907. The number of deaths shows a decrease of 18 which will be commented on later. There were no State prisoners in confinement at the close of the year.

Statement No. II—Religion, Age, Education and previous occupation of convicts.

7. It will be observed from the figures appearing in the statement noted in the margin that there is a decrease under males "Eurasians," "Native Christians" and under females "Hindus and Sikhs," while all other heads under "Religion" show an increase.

8. The number of juveniles admitted during the year under report was 62 as against 57 in the year previous, or an increase of 5 only. The Prisons of Thána, Karáchi and the Common Prison show an increase, but there is a most satisfactory decline on previous years on the whole. Of the 42 male and 20 female youthful offenders convicted, 23 males and 9 females were sentenced to one month and under, 15 males and 10 females to above one month and under six months and 4 males and 1 female to over six months. Out of the 62 admitted, 11 males and one female had previous convictions. A boy of 14 is given 5 days' simple imprisonment for gaming; a girl of 15, 4 days' simple imprisonment for theft; boys of 14, 4 days' rigorous imprisonment for begging. Such sentences are utterly useless, they are neither deterrent nor reformatory, and merely serve to remove from the juvenile mind the healthy dread of Prison which should exist. Out of the total of 62 juveniles admitted, 22 were sent to the Reformatory by the District Magistrate on reference from the Superintendent. All other sub-heads show an increase with the exception of the sub-heads "15 to 40" under females and "above 60" under males. Under the head "Education of convicts", the sub-head "able to read only" shows a decrease of 18 over the figures of the year previous. With the exception of the sub-heads "Persons employed in mechanical arts, manufactures, etc.," and "Miscellaneous persons not classified otherwise," all other sub-heads of "Previous occupation" show an increase. The percentage of the total number admitted to free population according to the census of 1901, is 0·156 during the year as compared with 0·145 in 1907.

Statement No. III—Nature and length of sentence.

9. There has been a marked increase under the heads "Not exceeding one month," "above one month and not exceeding three months," and "above three months and not exceeding six months," and a slight increase under the heads "above one year and not exceeding 2 years," "above 2 years and not exceeding 5 years," "exceeding 10 years and transportation,"

while all other heads show a decline. The Prisons of Sukkur, Yeravda and Bijápur show an increase under "Transportation for life," while Sukkur is also responsible for the rise under those sentenced to "term transportation." The slight increase under "exceeding ten years" does not call for any comments. There were 1,098 prisoners sentenced to simple imprisonment, 14,561 prisoners sentenced to rigorous imprisonment, and 184 sentenced to rigorous imprisonment with whipping as compared with 968, 13,647 and 185 in 1907. The number of prisoners sentenced to rigorous imprisonment with solitary confinement was 349 as compared with 406 in 1907, 450 in 1906 and 436 in 1905. Proper accommodation for carrying out sentences of solitary confinement is still needed in many Jails. 5,342 persons were sentenced to "not exceeding one month" as compared with 5,167 in 1907. Of these 2,762 were admitted to the Common Prison, Bombay.

10. The statement noted in the margin deals with reconvicted prisoners. The number of habituals identified by the Jail officials after arrival in Jail has fallen from 271 in 1907 to 208 in the year under report. 1,967 were classified as habituals out of a total of 3,271 previously convicted prisoners against 1,665 out of 2,771 in the year 1907.

Statement No. IV—Reconvictions.

Habitual.

1	2	3	4	5	6	7
Number.	Prisons.	Number of convicts admitted during the year. 	1906 ...	14,642	2,090	645	4	2,739

11. It appears from the information supplied by the Inspector-General of Police that 1,302 persons were identified in the Bombay Presidency inclusive of Sind as compared with 910 in the year previous. Of the 1,302 prisoners, 147 were identified in Bombay, 34 in Bijápur, 82 in Dhárwár, 193 in Dhulia, 103 in Thána, 193 in Ahmedabad, 197 at Yeravda, 48 in Ahmednágar, 71 in Belgaum, 78 in Násik, 63 in Sholápur, 37 in Sátára, 28 in Surat and the rest in other parts of the Presidency.

12. The number of escapes during the year under report has been 20 against 4 in the year previous. Of the 20 escapes, 8 were from the Yeravda Central Prison, 6 from the Ratnágiri Prison, 2 from the Deccan Convict Gang, 2 from outside the Hyderabad Central Prison, one from Kárwár Prison and one from the Ahmedabad Central Prison. Detailed reports on the escapes from Yeravda and Ratnágiri were submitted to Government and the officials at fault suitably dealt with as per this office Nos. 9263 and 11280, dated respectively the 9th October and 2nd December 1908. The prisoners who escaped from the Deccan Gang, Ahmedabad Central Prison, Kárwár Prison and Hyderabad Central Prison were employed on extramural labour. The warders at fault were dealt with departmentally in all cases save at Ahmedabad and Hyderabad. These warders were prosecuted and sentenced to pay a fine of Rs. 30 and Rs. 20 respectively. For the Kárwár escape a Convict Overseer was primarily responsible, and was sentenced to three months' simple imprisonment by the Magistrate before whom the case was tried.

Statement No. V—Escapes and recaptures.

13. The statement noted in the margin relates to offences committed by and the punishments awarded to convicts confined in the Prisons and 1st and 2nd Class Subsidiary Jails. The offences dealt with by Criminal Courts show an increase of 18 over the figures for the year previous as will be seen from the details given below :—

Statement No. VI—Offences and punishments.

	1907.	1908.
Section 52, Prisons Act.		
Relating to work	4	22
Do. prohibited articles	1	...
Indian Penal Code.		
Escapes	4	2
Attempting to escape	1	2
Allowing to escape	3	...
Assault	1	6
Theft	1	1
Total ...	15	33

14. It will be observed from the following table that the number of offences have risen from 15,303 to 19,980 or an increase of 4,677 over the figures for the year previous. This was due to a larger average number of prisoners confined in our Prisons and Jails during the year under report :—

	1907.		1908.	
Offences dealt with—				
By Criminal Courts	15		33	
	Dealt with by minor punishments.	Dealt with by major punishments.	Dealt with by minor punishments.	Dealt with by major punishments.
By Superintendents—				
Relating to work	5,837	1,422	8,312	2,207
Do. prohibited articles	1,711	483	2,034	475
Do. assaults, mutiny and escapes ...	168	230	227	368
All other breaches of prison rules	4,419	1,033	5,135	1,222
Total ..	12,135	3,168	15,708	4,272

15. The following table shows the nature of the punishments awarded during the past two years. It will be seen that the total number of minor and major punishments awarded by Superintendents during the year under report was 20,296 and the total number of offences was 19,980. The difference is due to 316 offences having been dealt with, during the year 1908, by the award of combined punishments:—

	1907.	1908.
Punishments inflicted—		
By Criminal Courts	15	33
By Superintendents—		
Warnings	2,063	2,229
Penal diet	1,689	2,702
Separate, cellular and solitary confinement	87	91
Handcuffing and link fetters	2,609	4,031
Other punishments	5,835	6,925
Total ...	12,283	15,978
Separate, cellular and solitary confinement	402	548
Penal diet with solitary confinement	122	81
Fetters or handcuffing behind or to a staple	1,763	2,891
Corporal punishments	108	110
Combination of minor punishments	205	129
Other punishments	632	559
Total ...	3,232	4,318
Grand Total ...	15,530	20,329

16. Of the 20,296 punishments awarded by the Superintendents of Prisons and Jails, 15,978 or 79 per cent. belong to the minor class and 4,318 or 21 per cent. belong to the major class. All the heads under "minor punishments" show an increase, while the heads "penal diet with solitary confinement," "combination of minor punishments" and "other punishments" under "major punishments" show a decline. The Prisons of Yeravda, Bijápur, Dhárwár, Thána, Karáchi and Hyderabad are responsible for the increase in punishments, while all other Prisons show a decline. The increase in punishments in the Yeravda, Bijápur, Dhárwár, Thána and Karáchi Prisons is due to increased population. In the Hyderabad Central Prison, the increase is due to an effort being made to improve wool spinning, which led to many punishments for short and bad work; and the introduction of the fly-shuttle loom, which is a very unpopular form of employment, also accounted for many punishments. Out of a total of 19,980 offences, 2,818 habituals were responsible for 8,879 and 3,972 non-habituals for the balance of 11,101 offences. The actual percentage of habituals to other prisoners is only 13·5. From the above it will be seen that only 6,790 prisoners were punished and the number who actually had passed through the Prisons or remained on 31st December was 24,113. Very many of these prisoners were only punished once, the punishment frequently being only a warning—2,229 warnings were actually given.

Of the total number of punishments, 1,406 were inflicted on Convict Officers for negligence in the discharge of their duties, etc.

17. The recidivist question is the penological difficulty of every civilized country. If every proved habitual criminal was deported for life to the Andamans or sentenced to indeterminate imprisonment, the good done would be enormous.

They form only about 13 per cent. of all prisoners in the Bombay Presidency, and they are the source of corruption in Prisons, of expense to the Police Department, and of injury to the public. To show the weakness of the

present system, I will quote three cases which I have recently come across in my inspections. There are dozens of similar ones :—

(1) Began crime at 20 years of age. Is now 44 and in under a sentence of two and a half years. Out of 24 years, he has spent 22 years and 2 months in Prison.

(2) First conviction on 25th February 1902, when he was 19 years of age. Is now in under a sentence of 2 years with 3 months' solitary confinement and 25 stripes awarded on 7th October 1907. Out of 5 years and 8 months, he has spent 3 years and 9 months in Prison and has had 43 stripes.

(3) First sentence on 9th September 1884, age under 20, sentenced to 2 years on 2nd November 1908. Out of the intervening period of 24 years, he has spent 21 years in Jail.

It is a trite observation that habituals are of two classes—the weak minded who should be more gently dealt with, and the man who deliberately selects crime as his means of livelihood, just as another man would become a carpenter, fitter or blacksmith, and it is clearly absurd to allow such a man to continue to prey on the public.

18. The separation of habitu als from other prisoners is carried out as far as possible. At Dhulia Prison, the segregation is most thoroughly carried out but even here some habituals during the day-time work with other prisoners.

The epidemic of Cerebro-spinal Meningitis in Hyderabad Central Prison interfered with the usual Prison arrangements. At Ahmedabad the habitual is kept separate as far as possible, *i. e.*, they are put into cells by themselves all night, the separation by day is not thorough. In Karáchi, there is separate accommodation for 120 habituals and at Sukkur for 24, the surplus number mix with the first offenders.

In all other Prisons the Superintendents endeavour to keep by themselves the worse class of habitual but the want of proper accommodation makes all efforts nugatory. Any industry like the Press at Yeravda renders the separation of the two classes impossible. Increased cellular accommodation is required in all Prisons. Each Prison should have sufficient cells to accommodate all the habitual prisoners, and if possible, a sufficiency of cells to enable the Superintendent to place all new admissions in them for a period of probation. The latter provision would be trebly useful. In the first place it is during the first two or three months of his sentence that a long term prisoner is most likely to come to grief. He rebels against his fate, the work and discipline are irksome, and the other prisoners are always ready to egg him on to defy authority and he feels he has a gallery to play to. In a cell if he does do short task or refuse to work, he can be dealt with more gently as his example cannot affect other prisoners.

Secondly, in the case of first offenders serving short sentences of three months and under, it is most desirable that they should in no way be exposed to any risk of corruption by evil communication, and also that the memory of Prison should be one of hard work, seclusion, and discipline. At present a short sentence for a trivial offence is often an education in crime. Lastly, if a long term prisoner later on in his sentence should prove refractory and insubordinate, it would no longer be necessary to resort to severe punishments to maintain discipline among the other prisoners. He would be simply reverted to the cell of his probationary period until his conduct improved. In accordance with Judicial Department No. 6282, dated 1st December 1905, liberal cellular accommodation will be provided in any new Jails. The cells for undertrials alluded to in paragraph 4 of Government Resolution, Judicial Department, No. 2837, dated 24th May 1906, are completed. This supplies a long felt want at Yeravda, but similar cells should be provided in every Central and District Prison, the necessity for them from every point of view is so obvious as to need no demonstration.

19. The subjoined table gives particulars as to the number of stripes inflicted on prisoners during the year 1908 in our Prisons. It will be seen that although the total number of corporal punishments is the same as in 1907, there is an increase in certain Prisons. These are Yeravda, Dhárwár, Kárwár, Karáchi, Hyderabad, Sukkur and Aden. Out of the 45 corporal punishments inflicted at Yeravda, 26 were awarded to habituals. Of these 3 were for assaults and 20 were for persistent short work, refusing to work and malingering. Ten floggings were awarded to Sindhi prisoners who again gave much trouble during the earlier part of the year. In Dhárwár Prison, out of 7 punishments, 2 were for assault and 5 for refusing to work. In Karáchi, two were punished for assault and three for instigating other prisoners to mutiny. In Hyderabad Central Prison, 5 prisoners were punished for refusing to work and 2 for assault. In the Aden Special Prison, the prisoners are mostly Somalies and Arabs, and the Superintendent reports that they are often of bad character and turbulent, and therefore flogging has to be resorted to maintain discipline.

Name of Prison.	Total number of male prisoners for the year excluding transfer from Prison to Prison.	Total number of Prison offences.	Total number of prisoners punished by whipping. 1907 ...	19,499	15,005	8	34	31	13	22	103	0·6	0·7	...	...	

20. During the year under report, 6,725 prisoners were fettered as compared with 5,178 during the year previous. The increase is partly due to the increased population as well as to the increased number of punishments awarded.

MARK SYSTEM.

21. It will be seen from the figures appearing in Statement C, appended to this report, that 2,743 prisoners were released during the year under the remission system as compared with 2,240 in the year previous. The percentage during the year 1908, of those released under the mark system, to the total number who might have been released under that system, if of average good conduct up to the date of release, was 98·0 against 98·4 in 1907. The practice of mustering prisoners and reading and explaining to them the benefits of the Mark Rules has been continued. Special reward under Rule 515 (7)—Remission for committing no offence during the previous twelve months—was granted

to 1,238 prisoners as against 1,448 in the year previous. The new Remission System lately sanctioned by the Government of India, *vide* Government Resolution, Judicial Department, No. 4414, dated 24th August 1908, came into operation from 1st of January 1909. Under the old system of remission, as far as my experience went, not one prisoner in ten knew anything about his remission, nor understood how, or why he got it. I hope that the new system will be much more easily comprehended by the more illiterate convicts.

Statement No. VII—Convict Officers.

22. The average number employed as Prison Officers during the year under report in our Prisons and 1st and 2nd Class Subsidiary Jails was 991 males and 9 females against 1,003 males and 11 females in 1907.

Statement No. VIII—Diet.

23. The statement noted in the margin shows the different diet scales in use in Prisons and 1st and 2nd Class Subsidiary Jails. These scales have been found to work satisfactorily. Such changes as have been made during the year are noted in the fifth column of the statement.

Statement No. XVIII—Undertrial prisoners.

24. The statistics of undertrial prisoners confined in our Prisons, Subsidiary Jails and Lock-ups are embodied in the statement noted in the margin. The number of prisoners admitted during the year under report shows an increase of 2,206 over the figures for the year previous. The daily average strength has also risen from 1,276 in 1907 to 1,363 in 1908, due to increased admissions.

25. The number of escapes shows an increase of 10 over the figures for the past year. Of the 23 escapes, 7 undertrials and one convict escaped from the Hála 3rd Class Subsidiary Jail in the Hyderabad District, 2 each from the Subsidiary Jails in the Districts of Lárkhána, East Khándesh and West Khándesh, 4 from the Subsidiary Jails in the Thar and Párkar District, one each from the Jails in the Kánara and Násik Districts, one from the Alibág Subsidiary Jail and two female prisoners from the 3rd Class Subsidiary Jails in the Karáchi District.

26. The number of deaths is the same as in 1907. Of the 20 deaths, 5 occurred in Prisons, 2 in the 1st and 2nd Class Subsidiary Jails and 13 in 3rd Class Subsidiary Jails and Lock-ups. Of the 13 deaths, 4 died of Pneumonia, 2 from Malarial fever, 1 from Dysentry, 1 from Hydrophobia, 1 from Acute Meningitis, 1 from Plague, 1 from Chronic Bronchitis and 2 from injuries—gun shot wounds received in committing a dacoity.

27. The number remaining on 31st December 1908 was 235 males and 9 females in Prisons, 89 males and 6 females in 1st and 2nd Class Subsidiary Jails, and 880 males and 48 females in the 3rd Class Subsidiary Jails and Lock-ups, thus making a total of 1,204 males and 63 females.

Civil Prisoners.

28. In the beginning of the year 1908, there were 45 male and 1 female prisoners in the Civil Jails. The number admitted during the year was 777 male and 1 female prisoners. 762 males and 1 female were released and one male died during the year under report, thus leaving a balance of 59 males and 1 female at the close of the year 1908. The daily average number has been 51 as against 40 in the year previous. The total cost per head have respectively been Rs. 5,807-14-2 and Rs. 113-14-1 during the year under report as against Rs. 5,477-6-3 and Rs. 136-14-11 in the year previous.

FINANCIAL.

Statements Nos. IX and X—Expenditure.

29. The statements noted in the margin deal with the gross expenditure on account of convicted and undertrial prisoners confined in the Central, District and Extramural Prisons and the Subsidiary Jails and Lock-ups. The cost of Police guards has been omitted as usual except in the case of the Central Prisons of Yeravda and Ahmedabad, and the Special Prison of Thána,

where the guarding is undertaken by the Reserved Armed Warder Guard. The realization from the sale-proceeds of garden produce has been deducted from the total charges. The gross expenditure during the year 1908 has been Rs. 8,45,354 and the cost per head Rs. 91-2-2 against Rs. 7,28,672 and Rs. 82-10-9 in the year previous.

Establishment.

30. The total cost under this head has risen from Rs. 2,78,947 in 1907 to Rs. 2,85,114 or an increase of Rs. 6,167. The increase is due to the entertainment of temporary establishment at Yeravda, to the permanent addition of three Warders at Dhárwár, Local Allowance to the Medical Officer and Warders at Karáchi, and to the grant of grain compensation to low paid subordinates during the year.

Dietary Charges.

31. Both the total cost and cost per head under "Dietary Charges" have risen from Rs. 2,88,657 and Rs. 32-12-0 to Rs. 3,87,088 and Rs. 41-11-8 respectively during the year under report. This increase is entirely due to increased population and to unfavourable contract rates for staple food-grains. Contractors sustained a loss on the contracts for 1907-1908. Owing to this and a bad monsoon the rates tendered for 1908-1909 were unfavourable. For the current year somewhat better rates have been quoted, but, in many instances, I have only accepted them for six months in the hope that a normal monsoon and good crops may produce a fall in prices, and thereby enable the Department to secure better rates for the closing six months of the year.

Garden.

32. The value of vegetables and other supplies from the gardens attached to our Prisons and Jails shows an increase of Rs. 561 over the figures for the year 1907, the figures being Rs. 18,218 in 1908 against Rs. 17,657 in the year previous. The gardens attached to the prisons at Yerávda, Dhárwár, Kárwár, Bijápur and Karáchi are responsible for this increase.

Hospital Charges.

33. The total cost and cost per head under "Hospital Charges" has been Rs. 38,982 and Rs. 4-3-3 against Rs. 32,950 and Rs. 3-11-10 respectively during the year previous. The increase is due in a measure to higher rates for food-grains and to the more liberal issue of extras to sick and weakly prisoners. The increase is most marked in the Prisons of Yeravda, Thána, Deccan and Sind Gangs.

Clothing and Bedding.

34. The expenditure under this head has fallen from Rs. 33,038 in 1907 to Rs. 30,277 in 1908. This is due to the Yeravda Prison not having issued any extra new clothing and to Ahmedabad not having manufactured any woollen jackets during the year. The Deccan Convict Gang receives its supply of clothing from other Jails but the cost (Rs. 1,198) was not adjusted before the close of the year. The cost per head has also fallen from Rs. 3-12-0 in 1907 to Rs. 3-4-3 during the year under report.

Sanitation Charges.

35. The total cost and cost per head under this head has fallen from Rs. 20,624 and Rs. 2-5-5 in 1907 to Rs. 19,525 and Rs. 2-1-8 during the year under report. The sub-head "Charges for Conservancy, Cleansing and Purifying" shows an increase while the other two sub-heads "Charges for Water-supply" and "Extraordinary Charges" show a decline. This latter is due to the reduction in the water-tax in the Bombay Prisons and to less consumption of water in the Karáchi Prison, and to the fact that only a small sum was paid to the Bombay Municipality for the treatment of prisoners in the Municipal Hospitals during the year 1908.

Charges for moving prisoners.

36. This head shows an increase of Rs. 704, the figures for 1908 being Rs. 28,481 as against Rs. 27,777 in 1907, but the cost per head has fallen from Rs. 3-2-5 in 1907 to Rs. 3-1-2 in 1908, due to increased population.

Charges for other Miscellaneous Services and Supplies.

37. The total cost and cost per head has risen from Rs. 26,388 and Rs. 2-15-11 in 1907 to Rs. 31,847 and Rs. 3-6-11 in 1908 respectively. The increase is due to larger payments being made on account of gratuities to released

convict officers on 2nd November 1908, to the cost of ammunition for the Armed Warder Guard at Thána, heavier lighting charges at Karáchi and Yeravda, to the Telephone connection at Karáchi, and also to the amounts paid for petty constructions and repairs having been debited to this head.

Travelling Allowance.

38. The total cost under this head shows an increase of Rs. 47 over the figures for the year previous, while the cost per head shews a small decline over the figure for the year 1907.

Contingencies.

39. The expenditure under this head has risen from Rs. 9,835 and Re. 1-1-10 in 1907 to Rs. 12,660 and Re. 1-5-10 respectively in year under report. In the case of the Yeravda Central Prison the increase is due to quinine having been supplied on a larger scale to indenting officers, necessitating the purchase of a larger number of Service Postage Stamps and to the supply of a Type-Writer Machine. Under the orders of Government conveyed in their No. 1398, dated 9th March 1909, a sum of Rs. 2,443 has been shown against this office under this head under "Charges for Registers and Stationery." This sum includes the cost of printing and binding for the whole of the Department. In former years only binding charges were shown, but owing to the new system of Press accounts, which renders the tracing of binding charges impracticable, the total value of work done is given and hence the increase.

Extraordinary Charges for Live-stock, Tools and Plant.

40. The total cost and cost per head under this head has increased from Rs. 6,107 and Re. 0-11-1 in 1907 to Rs. 6,984 and Re. 0-12-1 respectively during the year under report. There is a marked increase under the sub-heads "Conservancy and Watter-supply Dead-stock" and "Other Miscellaneous Dead-stock" which is due to the purchase of a larger number of articles of dead-stock such as conservancy carts, water tanks, etc., for the Yeravda, Karáchi, Rájkot, Sukkur, Thána and Bijápur Prisons and the Deccan Convict Gang.

Statement No. XI—Employment of Convicts.

41. The statement noted in the margin deals with the employment of convicts in our Prisons and First and Second Class Subsidiary Jails. It will be seen that the daily average number of prisoners sentenced to labour has increased in our Prisons from 7,174 in 1907 to 7,555 in 1908, while there is a decrease of 18 in First and Second Class Subsidiary Jails over the figures for the year previous. All the heads, with the exception of "Average number not employed for other reasons" and "Prison Officers," show an increase, while the figure under "Gardening" remains the same. The small increase under other heads is due to increased average strength and calls for no comment.

Statement No. XII—Net Cash Earnings.

42. The marginally noted statement deals with the net cash earnings of convicts sentenced to labour. The cash earnings have increased from Rs. 40,346 in 1907 to Rs. 85,100 in the year under report. The Common Prison, the Central Prison, Yeravda, Deccan Convict Gang and the Prisons of Bijápur, Kárwár and Ahmedabad show an increase, while all other Prisons show a decrease. The decline which is most marked in the Prisons of Thána, Sukkur, Dhárwár, Dhulia, Ratnágiri and House of Correction is due to a larger stock of raw materials, as well as manufactured articles, remaining on hand at the close of the year. In the House of Correction the decrease is more apparent than real, owing to an adjustment of Rs. 1,368 for matting supplied to the Marine Department in 1906 having been made in 1907. In the Yeravda Central Prison, out of Rs. 28,233 the Prison Factory shews a profit of Rs. 7,528, while Rs. 20,705 are for the Press. The large increase in the Press is due to increased output and to the return of empty packing cases for which the Press had not to incur any extra expenditure. The increase in profits in the Common Prison, Deccan Convict Gang, Kárwár and Ahmedabad is due to a larger number of prisoners having been employed on manufactures as compared with the year previous. Out of the sum of Rs. 85,100 mentioned at the commencement of this paragraph a sum of Rs. 61,303 represents the profits of our Prison Factories, Rs. 22,063 of extra-mural labour and Rs. 1,734

of our First and Second Class Subsidiary Jails. The average cash earnings per head of those sentenced to labour and of those employed on manufactures in the case of Prisons and First and Second Class Subsidiary Jails have risen from Rs. 5-7-0 and Rs. 16-5-0 in 1907 to Rs. 10-15-0 and Rs. 32-11-0 respectively during the year under report.

43. During the year 1908 jail-made articles of the value of Rs. 19,620 were sold to Government departments against Rs. 19,112 in the year previous, or an increase of Rs. 508. The figures for 1908 are:—

	Rs.
Public Works Department	1,477
Telegraph Department	302
Other Civil Departments	15,020
Marine Department	2,142
Military Department	651
Ordnance Department	28

Sind Gang.

44. This Gang was located at Ganja Tákar near Hyderabad throughout the year. The earnings of the Gang have fallen from Rs. 10,813 with an average of 428 prisoners in 1907 to Rs. 10,359 with an average of 459 prisoners during the year under report. The decline in the cash profits is more apparent than real, as at the close of the year there was metal worth Rs. 25,800 on hand. If this had been sold the profits would have risen to Rs. 36,159. Throughout the year the prisoners were employed in laying ballast on the Hyderabad-Badin Section of the North-Western Railway and in breaking metal in the quarries near the Gang camp. The railway authorities were thoroughly satisfied with the work done by the Gang.

Deccan Gang.

45. This Gang was located at Visápur in the Ahmednagar District throughout the year. With an average population of 581 prisoners the Gang has earned Rs. 5,769 in 1908 against Rs. 2,854 with an average of 492 prisoners in 1907. The increase is chiefly due to the average number employed on works being more than in the year previous. The buildings, garden and general discipline of this Gang reflect great credit on the Superintendent.

Sale of Quinine Packets.

46. The net profit of the quinine industry in the Central Prisons of Yeravda and Hyderabad amounted to Rs. 4,222-4-11 during the year as against Rs. 3,125 in 1907. The Central Prison of Yeravda shows a profit of Rs. 2,850-9-2, while a sum of Rs. 1,371-11-9 represents the profit of the Hyderabad Central Prison. The value of quinine and packing materials purchased during the year was Rs. 27,017-7-4 against Rs. 22,341 in 1907, and the amount paid into the Treasury during the year under report was Rs. 31,575-11-7 against Rs. 22,811 in the year previous.

Yeravda Printing Press.

47. In addition to supplying the requirements of this Department the Yeravda Prison Press has, during the year under report, printed forms for all Government Departments with the exception of Civil Medical forms. The total number of forms, envelopes and books supplied to all the departments was respectively 20,106,644, 7,174,232 and 99,570 against 11,993,303, 13,031,623 and 84,740 in the year previous. The net profit is Rs. 65,000 as against Rs. 52,698 in 1907.

The engines were ready on the 1st October 1908, but great difficulty was experienced in running them at first. However, an Electrical Engineer was obtained through the Public Works Department, and the engines are now running satisfactorily, and I trust that the difficulties experienced in this respect are over. The cost of running the engines will be much higher than was anticipated, the pay of the present Engineer being Rs. 150 a month. The supply of convicts fit for clerical and composing work has been insufficient during the year, and I do not think that the Prison can furnish this kind of labour in the quantity required. The question of maintaining proper discipline and exacting proper tasks in a Press is a difficult one. The problem is still further complicated by the existing system of convict officers. If a good

workman and well behaved prisoner is not promoted he feels he has a grievance, and if he is promoted the Press loses a workman just as he has reached his highest point of efficiency. I hope shortly to report fully to Government on this and cognate matters.

Statement No. XIII—Net Cost.

48. The statement noted in the margin shews the total cost of maintenance for all Prisons, Subsidiary Jails and Lock-ups. The total expenditure, excluding charges for Inspection and General Superintendence, has amounted to Rs. 8,03,441 during the year under report against Rs. 6,89,327 in 1907, or an increase of Rs. 1,14,114. The total cash earnings have been Rs. 85,100 against Rs. 40,346 in the year 1907, thus making a total net cost to Government of Rs. 7,18,341 during the year against Rs. 6,48,981 in the year previous. The average net cost to Government per prisoner has been Rs. 77-7-0 in 1908 against Rs. 73-10-0 in 1907. The increase is chiefly due to the increased population and to the high prices of food-grains prevailing throughout the year.

VITAL.

Statement No. XIV—Sickness and Mortality.

49. The statement noted in the margin deals with the sickness and mortality amongst prisoners of all classes during the year. The following table compares the figures for 1907 and 1908 of prisoners confined in Central, District, Special and Extra-mural Prisons, Subsidiary Jails and Civil Jails and Lock-ups:—

Year.	Daily average strength.	Admissions into Hospital.	Daily average sick.	Total number of deaths.	Ratio of deaths *per mille*.
1907	8,854	5,916	255·7	180	20·3
1908	9,327	6,044	279·8	162	17·4

50. The death-rate for the year is 17·4 *per mille* and is the lowest recorded in the last 30 years, save in 1905 when it was 17·1 When it is remembered that Malaria was very prevalent in many districts, and that the Central Prison, Hyderabad, had to contend with an outbreak of Cerebro-spinal Meningitis, this death-rate is very satisfactory. To obtain such a result necessitates unceasing care and unremitting attention to detail on the part of the Superintendents and Medical Officers.

51. Throughout the Presidency only 1 prisoner contracted Plague; this man died. He was admitted suffering from the disease. Inoculation was resorted to in all places where Plague was prevalent amid the surrounding population, and was, as usual, an absolute safeguard.

52. There was overcrowding in the following Prisons:—His Majesty's Common Prison, Yeravda, Bijápur, Hyderabad, Sukkur, Dhárwár and Karáchi. Of these Prisons only Hyderabad, Bijápur and Sukkur show a death-rate of over 20 *per mille*. The overcrowding at Yeravda was very slight, and as Sukkur was overcrowded in the hot weather, when all prisoners sleep in the open, no inconvenience really arose there. The overcrowding in Dhárwár and Karáchi was immaterial. It is almost impossible to avoid overcrowding in the Common Prison; prisoners are constantly drafted from this Jail. At Hyderabad tents were used to relieve the pressure.

53. The following Prisons which show a death-rate of over 20 *per mille* are dealt with in detail:—

Bijápur, 21 per mille.—This Prison was overcrowded throughout the year. It is structurally a defective Prison. The under-trial ward was particularly overcrowded at times. The principal heads of admission to Hospital were Malaria, Pyrexia of uncertain origin, Guinea worm and Bronchitis. The cases of Malaria and Guinea worm were contracted outside the Prison. Of the seven deaths, five were due to Chronic Bronchitis; of these five, three were admitted to Jail suffering from the disease and were old broken down men.

House of Correction, 23·1.—There were five deaths—Tubercle 3, Diarrhœa 1, Valvular disease of heart 1. Of the Tubercle cases, two were admitted suffering from the disease. This Prison is structurally defective.

Ratnágiri, 21·5.—There were only two deaths, one from Calculus (a disease contracted by the prisoner while a free man), and one from Hæmorrhage into the cerebellum.

Kárwár, 25·3.—Dysentery and Malaria were the principal heads of admission. The Malarial cases were almost all recrudescence of old infection; many of the Dysentery cases had previously suffered from repeated attacks of this disease outside. I was not satisfied with the cooking arrangements in this Prison and have given directions for their improvement. Of the five deaths, Aneurysm of the thoracic aorta, Embolism of the heart and Lumbar Abscess cannot be said to be due to any hygienic fault in the Prison. The prisoner who died from Syncope did so six days after his admission and had not been put on any labour.

The patient who died from Chronic Dysentery had had repeated attacks outside the Prison and was an old emaciated man. In this Prison all drinking water is boiled. Dysentery patients were isolated for a month after recovery, extra bedding was issued in rains and cold weather, and extra diet freely given to prisoners in poor health or who were losing weight.

Sukkur, 20·8.—Malaria was very prevalent in the district. Of the 8 deaths, five were due to Malaria. Of these five, four were certainly infected on admission—one had fever and two enlarged spleens. The fifth case developed the attack which carried him off 35 days after admission, and it is doubtful as to whether he contracted the disease in the Prison.

Sind Gang, 37.—The prisoners were exposed to every vicissitude of weather. Up to April there was a party of 200 prisoners engaged in ballasting the Hyderabad-Badin line.

In July, during unprecedently heavy rain, the whole camp collapsed and the prisoners and all the Prison staff had a very rough time. Taking everything into consideration the occurrence of cases of Pneumonia and sunstroke is not to be wondered at. But the Pneumonia was not of the deadly type which used to ravage the Sind Prisons and the Gang.

A new and roomy Hospital for Pneumonia cases has been built, and I hope that this will do something to diminish the number of cases and to render their treatment more easy. Assistant Surgeon Petigara and his staff deserve great credit for the manner in which every contingency, arising from the heavy storm in July, was met with. Of the 17 deaths, Pneumonia accounts for 7 and sunstroke for 3.

Cholera, Dysentery and Diarrhœa were prevalent in Hyderabad during the hot weather and Malaria in the autumn. Quinine was issued weekly to every prisoner in 10-grain doses. The health of the Gang at present is excellent.

Hyderabad, 39·4.—There was overcrowding from January to October. There were 34 deaths; of these, 4, *viz.*, those under Ascites, Syphilis, Scurvy and Empyema, were admitted suffering from the disease from which they died. There is very little doubt but that the prisoner who died of Typhoid fever contracted the disease before admission.

Twelve deaths were due to Cerebro-spinal Meningitis. A report on the first outbreak was submitted to Government under this office No. 5430, dated 22nd June 1908. The last case occurred on 7th June 1908. Of eight cases 6 died and 2 recovered. A case then occurred in September, one in October, one in November and four in December. I have hopes that the second outbreak is now at an end, and a full report will be submitted shortly to Government.

The enlargement and improvement of the Hospital of this Prison is an urgent necessity. No one could realize how difficult the task of the Medical Officer was rendered during the prevalence of Cerebro-spinal Meningitis unless he had seen the overcrowded condition of the Hospital. To treat in such a Hospital, Pneumonia, Dysentery and Cerebro-spinal Meningitis, under Prison conditions, is a heart-breaking task.

54. The health of the Prisons of Dhárwár (2·8), Ahmedabad (12·), Deccan Gang (15·4), Dhulia (12·4) and Yeravda (12·9), Common Prison (14·3) and Thána (15.4), is satisfactory. The more so when we look into the actual causes of mortality. In Yeravda, of 20 deaths 9 are due to Tubercle. The Superintendent reports that 7 of these contracted the disease outside the Prison. In Ahmedabad, of 14 deaths 2 of Tubercle, 1 of Heart Disease and 1 of Chronic Ulcer were admitted suffering from the disease from which they died.

55. In Dhulia, 3 out of the 5 deaths were due to Tubercle of Lung and Phthisis from which the prisoners were suffering on admission. In the Common Prison, the fatal cases of Tubercle (2), Plague (1), were admitted suffering from the diseases.

56. The following measures were adopted during the year under report with a view to improve the health of prisoners confined in our Prisons and Jails, and are inserted in accordance with the orders contained in paragraph 1 of Government Resolution, Judicial Department, No. 9115, dated the 29th December 1896:—

(1) Issue of wheat and rice in lieu of *bájri* and *jowári*.
(2) Issue of extra rations to weakly prisoners and convalescents.
(3) Issue of 2 ozs. of extra flour to working prisoners in the Deccan Gang.
(4) Issue of quinine as a prophylactic.
(5) Issue of potatoes and onions in lieu of green vegetables.
(6) Inoculation by Professor Haffkine's prophylactic serum.
(7) Issue of extra warm clothing when considered necessary.

57. Reviewing the health statistics of Subsidiary Jails and Lock-ups it will be observed that the total population has increased from 58,596 in 1907 to 60,682 in the year under report. There is also a rise in the daily average strength, number of admissions into Hospital and the daily average sick, the figures being respectively 1,388, 861 and 22·3 against 1,315, 692 and 15·4 in 1907, but the number of deaths has fallen from 22 to 18 and the ratio *per mille* of average strength has also fallen from 16·7 to 13·0.

Statement No. XV—Chief Diseases.

58. The marginally noted statement shows the diseases chiefly responsible for sick admissions and deaths. There was one fatal case of Cholera in Hyderabad Central Prison. The disease was prevalent in the surrounding district.

Dysentery shows an increase of 44 in admissions but 6 less in deaths. The disease was mild in type.

Malaria shows a diminution of 312 in admissions and 6 deaths against 4 in 1907. Of the 6 deaths two occurred in Sukkur Prison. Yeravda is entirely responsible for the diminution in Malaria, shewing only 287 admissions against 673 in 1907. At this Prison quinine was issued throughtout the year—5 grains six times monthly.

Tubercle shows 50 admissions and 23 deaths against 46 admissions and 18 deaths. Of the 23 fatal cases 15 were admitted suffering from the disease. An urgent need in all Central Prisons is a Tubercle ward. Anæmia and Debility show a slight decrease.

The admission for all other general diseases remains practically stationary, but the deaths due to these are 10 more; the increase is practically due to Hyderabad Central Prison—12 deaths from Cerebro-spinal Meningitis.

Pneumonia shows a decrease of 39 in admissions and 18 in deaths. For this diminution Hyderabad and the Sind Gang are responsible, shewing 56 admissions and 9 deaths against 86 admissions and 17 deaths in the previous year and 44 admissions and 7 deaths against 54 admissions and 13 deaths.

The same Prisons account for the decline in respiratory diseases.

Diarrhœa shews a marked increase in admissions, 101, although the deaths are less than half those of the previous year. For this increase in Diarrhœa admissions Yeravda is responsible, and on the recommendation of the Medical

Officer certain alterations in diet will be sanctioned during the monsoon as an experiment. Abscesses, Boils and Ulcers of all kinds shew an increase of 61 and 2 deaths instead of one.

Yeravda Central Prison and the Deccan Extra-mural Gang are the chief contributors. The Deccan Gang have a long way to walk to their work and have to wear fetters. In Yeravda I fancy a good many are self-produced in order to get a few days in Hospital. Of the two deaths one was a beggar admitted in Prison with a Chronic Ulcer and the other died, in my opinion, rather from Dysentery than abscess.

59. Out of a total number of 17,763 prisoners who were discharged during the year, 9,970 or in other words 56·1 per cent. gained weight against 55·5 in the year 1907, 3,413 or 19·2 per cent. lost weight against 20·2, and 4,380 or 24·7 per cent. remained stationary as compared with 24·3 per cent. in 1907.

OFFICIAL AND NON-OFFICIAL VISITORS.

60. There were two hundred and seventy-three official visitors during the year for our Prisons and First and Second Class Subsidiary Jails. Seventy-six quarterly meetings were held during the year and all were well attended. Seven hundred and ninety-four visits were paid by official visitors while one hundred and thirty-six were paid by non-official visitors.

BUILDINGS.

61. The following allotments were sanctioned during the year for original major works:—

	Rs.
(1) Constructing 15 cells for under-trial prisoners at the Yeravda Central Prison	5,000
(2) Electric installation at the Yeravda Central Prison ...	14,000
(3) Quarters for 7 Warders, Chief Operator and Chowkidár at Karáchi Prison	7,000
(4) Constructing 6 cells for European prisoners at the Aden Special Prison	12,000

In addition to the above a sum of Rs. 15,000 was allotted for the discretionary grant, the whole of which was expended during the year under report.

MISCELLANEOUS REMARKS.

62. During the year 1908 the following Prisons, Gangs and Subsidiary Jails were inspected either by Mr. Alexander or myself:—

Central Prisons.	District Prisons.	Subsidiary Jails.	Gangs.
Yeravda. Hyderabad. Ahmedabad.	Sukkur. Common Prison. Karáchi. Rájkot. Dhárwár. Bijápur. House of Correction. Thána.	Wadhwán. Belgaum.	Sind. Deccan.

OF THE
OMBAY
BRANCH
OF THE
STATE

63. The Special Class at Thána at present consists of only six prisoners; 19 were released on the 2nd November 1908.

Owing to the release of many well conducted prisoners and Convict Officers on the 2nd November every Prison Superintendent has experienced great difficulty in getting suitable prisoners for the Convict Officers grade; many convicts have had to be promoted who were neither qualified according to rules,

nor in other ways fitted for the grade. This difficulty will continue to exist for some time, and I fear that no prisoners can be drafted to the Special Class for the present. Prisons had hardly recovered from the releases of 1903 when the releases of November 2nd took place, and every Prison has more or less experienced disciplinary difficulties on this account. The prisoners in the class have behaved excellently and given no trouble.

64. The question of better pay for the Warder staff was mooted first in 1905, and in 1907 Mr. Alexander submitted a full and detailed scheme, improving the pay and prospects of promotion of the Warders, and giving them shorter hours of duty. This has been sanctioned by Government as per Government resolution, Judicial Department, No. 198, dated 26th February 1909. I am hopeful that as a result a better class of recruit will come forward. As directed by Government I will report on the effect produced after a year. Quarters must be provided for the increase of the staff before the full value of the scheme will become evident, as, until the various Prisons recruit up to the sanctioned strength of the new establishment, any reduction in the present long hours of daily duty cannot be effected.

65. The juvenile class at Dhárwár has worked excellently during the past year and turns out very good carpentry work. Sixty-seven juveniles have so far gone to this class; 21 have been returned as unsuitable for various reasons, 32 are working in the class at present and 14 have been released. None of the latter are in any Prison in the Bombay Presidency, so that, presumably, they are keeping straight. Mr. Alexander, in this office No. 7558, dated 20th August 1908, submitted a scheme for the establishment of a Borstal Prison for these youthful criminals. This is the most important reform needed in the Prison Department, and would, I am sure, pay for its original cost over and over again. By reforming any large percentage of these youths you dry up the source from whence flows the evil stream of habitual crime. It is the juvenile adult between 16 and 25 years of age, who developes into the confirmed habitual. In my fourteen years' Prison experience I have hardly ever come across a hopeless recidivist whose career of crime did not begin before 25.

I have the honour to be,

Sir,

Your most obedient servant,

J. JACKSON, M.B., Major, I. M. S.,

Acting Inspector-General of Prisons,

Bombay Presidency.

STATEMENTS.

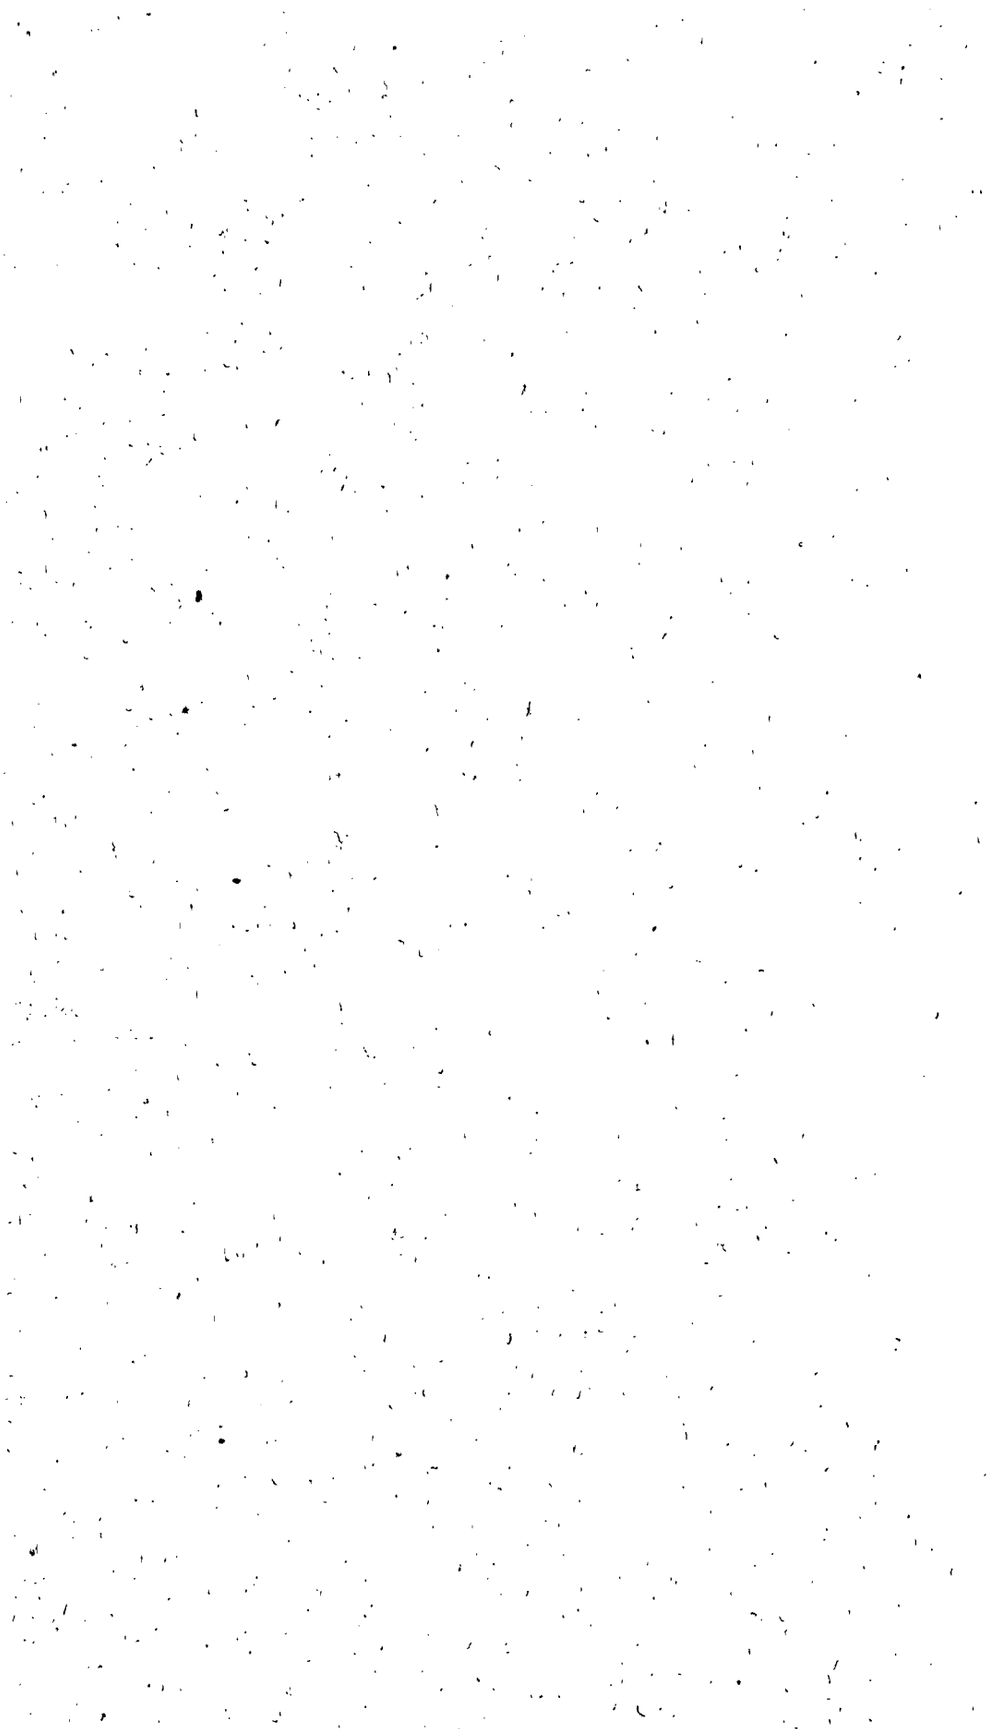
BOMBAY : PRINTED AT THE GOVERNMENT CENTRAL PRESS.



Annual and Periodical Reports.

Administration Report on the Bombay Prison Department for the year 1908.

No. 3403.

JUDICIAL DEPARTMENT.

Bombay Castle, 16th June 1909.

Letter from the Inspector-General of Prisons. No. 4229, dated the 20th April 1909—Submitting the Annual Administration Report on the Bombay Prison Department for the year 1908, together with a statement contrasting the main results of the administration of the Department during the years 1907 and 1908.

RESOLUTION.—The total population of the Prisons, Subsidiary Jails, Lock-ups and Civil Jails increased during the year from 87,250 to 90,408, the daily average population rising in consequence from 8,854 to 9,327.

2. The most noticeable increases occurred in the case of the Common Prison, the Central Prisons of Yeravda and Ahmedabad, the Prisons of Dhulia, Kárwár and Karáchi, and the Thána Special Prison, and were largely due to the riots in Bombay, the dearness of food-grain and the closing of the Hyderabad Prison for two months

3. Juvenile offenders increased from 57 to 62 but nevertheless there is a satisfactory decrease from the numbers in previous years.

The Governor in Council is in entire agreement with Major Jackson's opinion upon the subject of imprisonment of juveniles, and in drawing attention to the remarks contained in paragraphs 8 and 65 of the report under review, he desires that constant attention should be given to the well known policy and views of Government in this matter, as laid down in Government Resolution No. 5284 of 3rd October 1906.

4. The very great disparity between the numbers of convicts in the Dhárwár Prison identified as habitual offenders before and after conviction requires notice. The District Magistrate should make inquiry as to the failure to identify, while still under trial, such a large number of habitual offenders who presumably received, in consequence, inadequate sentences.

5. The Mark System continues to have a very favourable effect on prison discipline, as is shown by the fact that 98 per cent. of the prisoners who could earn remission by average good conduct were sufficiently well behaved to do so.

6. The Governor in Council recognises the force of the Inspector-General's remarks as to the evil influence of habitual criminals upon other convicts and as to the measures which are necessary to prevent it. Separate cellular accommodation should be extended as means will permit. Major Jackson's proposals for the improvement of the prison system in other respects will be awaited.

7. The total expenditure on the upkeep of prisons amounted to Rs. 8,45,354 as against Rs. 7,28,672 last year, an increase of Rs. 1,16,682, while the total cost per head amounted to Rs. 91-2-2 as against Rs. 82-10-9 in 1907.

Dietary charges which rose by nearly Rs. 9 per head owing to the high price of food-grain account for almost the whole of the increase, but there was also a slight advance in the cost of establishment and in hospital charges. The net cash earnings of the convicts increased from Rs. 40,346 to Rs. 85,100, and thus show a great improvement on last year, but are still considerably below the figures for 1906 which were Rs. 1,19,164. A great deal more work was turned out of the Yeravda Prison Press, and the net profits rose from Rs. 52,698 to Rs. 65,000. It is recognised that there are limits both to the scope and to the efficiency of prison industries, and on the whole the results achieved by the Press are very creditable.

8. The vital statistics show that, although sickness was somewhat more prevalent than in 1907, yet the death rate of 17·4 per mille was the lowest recorded during the last thirty years with the exception of 1905. The results of

the plague inoculation measures are remarkable, and afford strong evidence of the value of inoculation as a preventive of plague. The Governor in Council agrees with the Inspector-General that the figures are highly creditable to the Superintendents on whose care and attention the health of the prisoners depends in a large degree.

9. The substantial rise in the number of prisoners must have caused a considerable increase in work, and the Governor in Council is pleased to express his appreciation of the manner in which the Inspector-General and Superintendents have administered the prisons in their charge.

(Signed) J. T. SCOTSON,
Acting Under Secretary to Government.
